Hello Chloe,

I have been assigned to the case and I am currently working on your screening opinion request SC2305. Assuming the application is not considered screened into needing an EIA, we will consider this to be a band 2 project. With your application you will need to submit a complete and signed application form, a WFD compliance assessment, a method statement, an environmental report containing sufficient information for us to conduct a HRA (pathways, impacts, mitigation measures, etc), a Welsh National Marine Plan signposting document. You will know you have to show consideration of the Shoreline Management Plan for this project.

A CEMP will be helpful, and it might be worth touch base with the archaeological consultees (Welsh Archaeological Trust, CADW, RCAHMW) to ensure there will not be archaeological issues as a WSI might be required. Also, check with NRW A to make sure a Biosecurity Risk Assessment will not be needed (I do not think you will need one but best to check).

I think that should be all but other matters might arise during consultation as we will consult with navigation bodies, local planning, etc.

Regards,
Maria

Subject: PreApp enquiry connected to EIA screening doc (NRW ref: WPCC13688 Our ref: SC2305)

Good afternoon marine licencing team,

Submitted to you last Friday (NRW ref: WPCC13688, Our ref: SC2305) was an EIA screening document which is related to this email enquiry.
We wanted to make a formal pre-application enquiry about the list of documents that are essential/ nice to have's for our full marine licence application. Here is the list of documents we plan to submit with the marine licence application:

- Preliminary Ecological Appraisal (PEA)
- WFD stage 1 and 2
- HRA stage 1 and 2
- Project Environmental Report
- Environmental Action Plan (EAP, a Construction Environmental Management Plan equivalent)
- Method Statement

From the preapplication advice we have received so far, it indicates that statutory EIA will not be required and a band 2 marine licence will satisfy the needs of this project. We are currently preparing our application for the marine licence using the band 2 format, unless advised otherwise. Once this and all the documents in the list above are prepared, we will be submitting an application for a band 2 marine licence once we have received a response from the EIA screening opinion (NRW ref: WPCC13688, Our ref: SC2305).

In the hopes to remove the need for pre-commencement conditions, which would likely delay the project, I wanted to get in touch to make sure we have a complete first submission that will satisfy your needs. If there are documents you would like to see submitted with our band 2 marine licence, please can you inform us of these?

Many thanks,

Chloë James
