Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

13 November 2018 12:10 – 13:20
The purpose of the inspection was to determine compliance with the Regulation 36 Notice which expired on the 13 November 2018.

Batteries that were being stored outside were contained in a chemical resistant container with a lid that prevented the ingress of water.

The drainage pipes that were exposed during the last two inspections, had been concreted over. M&R Commercial have ordered a full retention oil interceptor which should be installed in the next few weeks. A trade waste agreement has been approved by Welsh Water.

The oil interceptor has recently been emptied by Towy Waste.
ACTION: Please provide the hazardous waste consignment note showing the removal of this

waste.

The Regulation 36 notice has been complied with.
