Mitigation Method ID		Mitigation Method Applied							
ID No.	Detail	Hectares Applied	Date Actioned	Date actioned	Date actioned	Date Actioned	Date Actioned	Date Actioned	Comments
15	Loosen compacted soil [redacted]	40					[redacted]		
32	No P fertiliser to high P-index soils	95							
23	Integrate fertiliser & manure nutrient supply	119							
22	Use a fertiliser recommendation system	119							
26	No fertiliser at high risk times	119							
25	No fertiliser to high risk areas	0							
68	No manure in high risk areas	0							
21	Fertiliser spreader calibration	0							
31	Use clover in place of N fertiliser	0							
6	Cultivate land in Spring rather than Autumn	12							
19	Make use of improved genetic resources	12							
20	Use plants with improved N efficiency	12							
37	Reduce stocking rate in wet soils	24							
39	New water troughs with a firm, permeable base								
57	Minimise slurry/dirty water produced								
60	Site muck heaps away from watercourses/drains								
61	Muck heaps on an impermeable base + collect leachate								
72	No FYM spread at high risk times								
76	Fence off rivers and streams form livestock	25							
78	Re-site gateways away from high-risk areas								
79	Farm track management	70
