Dear Sir

**Application for Tier 3 Bespoke Environmental Permit Based upon SR2008 No. 3 50kte - Household, Commercial & Industrial Waste Transfer Station with Treatment.**

Please find enclosed the completed relevant application forms and associated supporting documents required for the application of a Tier 3 Bespoke Environmental Permit. The application is based upon the Standard Rules Permit SR2008 No.3 50kte - Household, Commercial & Industrial Waste Transfer Station with Treatment.

The application form is accompanied by the requisite fee, in the form of a cheque for £8,208.00, which has been calculated through the OPRA charging scheme and guidance.

A Tier 3 Bespoke Permit Environmental is required, as the proposed site does not meet the location requirements of SR2008 No.3 due to its proximity to the coastal SSSI.

The site has been active for some years under exemption without adverse effect on the local environment or cause for nuisance complaint from the surrounding population. The proposed operational activities are relatively small scale and are not considered to increase environmental risk to the site and surrounding area significantly, furthermore, given the current operational activities and associated permissions issued to neighbouring sites/operators it is envisaged that the risks are proportional.

I trust the submission made is sufficient and look forward to your prompt confirmation and swift determination of this application. Should you have any queries or require any further information please do not hesitate to contact me.

Yours faithfully

David MacKay
