Schedule

1. Fire Prevention and Mitigation Plan (FPMP)

Please provide answers to the below action points as a revised FPMP

If granted, you will need to have a fire prevention plan in line with our current guidance and operate it in line with our current guidance. We have assessed the FPMP (Third version submitted, received 03/05/18) submitted with this application (in response to the Schedule 5 notice sent 25/04/18) against the current guidance [Fire Prevention & Mitigation Plan Guidance – Waste Management Guidance Note 16 \(Document Version 2.0\)](#) (from here on referred to as “the guidance” in this section).

1.1 *Water supplies*

You have stated that there are not enough water supplies on site to suppress the largest stack on site. The largest stack is 1600l therefore the estimated minimum water supplies required would be 1,919,880 litres.

The plan you have provided shows that there is watercourse nearby.

Action:

- a) Please clarify if there is any access point to the watercourse that the FRS could use in the event of a fire and mark on the site plan, and what the distance and drop is to the watercourse.

1.2 *Enclosing stacks using bays and walls*

You have clarified there will be 5 bays with concrete walls. The guidance states that the walls need to be of sufficient height, thickness and construction to offer fire resistance period of at least 120 minutes.

Action:

- a) Please provide the specification for the walls to demonstrate that they are suitable.

1.3 *Reviewing and Monitoring your FPMP*

The FPMP states that there will be a scheduled review of the FPMP every 12 months. The guidance states that it needs to be reviewed regularly to reflect any changes that our business experiences.

Action:

- a) Please state the key triggers for unscheduled reviews, and what parts of the FPMP would need reviewing.
