The main features of the permit are as follows.

This is a Tier 3 bespoke permit for a for a hazardous and non-hazardous mixed metal waste treatment and vehicle depollution facility.

Treatment operations are limited to manual and/or mechanical sorting, separation, dismantling, grading, screening, depollution, shearing, stripping, cutting, crushing, compaction, baling, granulation and bulking.

Permitted waste types are waste electronic and electrical equipment (WEEE), end-of-life vehicles (ELV), tyres, batteries and metal wastes.

The maximum quantity of waste accepted and processed on site shall not exceed 74,999 tonnes per year.

Relevant storage and treatment capacity thresholds have been included in the permit to reflect the legal waste facility operational limits; above which, the site would be operating as an Industrial Emissions Directive installation. (See Table S1.1 for relevant limits.)

This permit does not allow any point source emission into surface waters or groundwater except:

- clean, rainfall dependant drainage from areas of the site not used in connection with the storage and/or treatment of waste, and

There are to be no emissions to surface and/or groundwater from the buildings on site.
