Morning Darran

I have been seeking some advice on the permit requirements for Herbert Road. As I explained when we met as the area is within 500m of the River Usk which is a SSSI there would normally be a requirement to obtain a full Bespoke permit, however there are some permits that are covered within what is known as a Teir 2 bespoke.

The permit you will require is a SR2010 No8 which covers for use of waste upto 100,000 tonnes.

The application cost will be £2,570 and the annual subsistence if you require it for more than 1 year will be £1,990. The final surrender charge will be £3,500.

You will need to include a robust risk assessment with your application to show minimal risk to the location by the deposits made.

Regards

Tony
