Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the transfer in part of an environmental permit to a new operator (the transferee) and the changes made to the original permit (the transferor's permit).

The part transfer has resulted in a reduction of the permitted area as reflected in the new site plan, and the decrease in annual throughput from 140,000 tonnes per annum to 65,001 tonnes per annum for the wood waste treatment and RDF storage and all associated conditions/requirements in the existing permit.

As a result of the part transfer, the fire condition and associated improvement condition to amend the fire prevention and mitigation plan has been added and incorporated.

Any changes made as a result of the part transfer are set out in Schedule 1.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
