## Schedule

1. Please provide a detailed explanation and plan on how you intent to prevent the discharge of process effluent from the steam boilers from going into ground as required by the low impact installation criteria. This response should include, but not limited to;
  - a. What method you propose to ensure that the discharge process effluent will not go to ground. If this is draining to foul sewer, will this still meet the requirements of the trade effluent consent. If any other method, how will the collected effluent be disposed.
  - b. The time frame that you expect to implement and complete this by.
  - c. How the proposal will ensure the site will meet the criteria for Low impact installation.
