At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Inspection of Rhiwsaeson WWTW on 6/04/2022. Weather was dry.

Discharge location as described in table S3.2. Sample point in location as described on licence and appropriately labelled.

Site appeared well maintained. Logs of both daily maintenance and sampling seen, all up to date (last few days prior to visit and some sheets chosen at random checked).

Although not a requirement of permit, better access to outfall should be considered so that it can be checked by NRW for incident response and by DCWW for maintenance.

No further action required.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.
