

Mr Richard Livock
Puma Energy UK Limited
Milford Haven Terminal
Milford Haven
Pembrokeshire
SA73 3JD

Dear Richard,

Environmental Permitting (England and Wales) Regulations (as amended)
Permit KP3036AX – Temporary Boiler

Further to your letter dated 17th July 2015 outlining your proposal for a temporary boiler in accordance with Table S1.7, NRW have reviewed your proposal and have no objection to the activity. It has been noted that since the shutdown of the refinery, the ambient background noise levels (day/night) have reduced and would request that Puma review their noise management plan taking into account this temporary change.

If you have any questions regarding any of the above information please contact me on the details below.

Yours faithfully

Gary Evans
Technical Specialist
