

Richard Livock
Senior Environmental Engineer
Murco Petroleum Limited
Milford Haven Refinery
Milford Haven
Pembrokeshire
SA73 3JD

Dear Richard,

Environmental Permitting (England and Wales) Regulations (as amended)
Permit AP3830XQ – Improvement Condition 32

I acknowledge your letter dated 27th of November 2014 outlining that the Refinery Operations have been shut down since May 2014. The letter outlined that the company also ceased all Large Combustion Activities by mid December 2014, and subsequently NRW have issued a Variation Notice removing these activities from the Permit.

As a result of the change to the permitted activities and the confirmed shutdown of the refinery operations, NRW can confirm that Improvement Condition 32 can be closed.

If you have any questions regarding any of the above information, please contact me.

Yours faithfully

Gary Evans
Technical Specialist
