Dear Ms Corbett

**Environmental Permitting (England and Wales) Regulations 2010
Improvement Condition Responses**

I refer to your letter, received on 29 May in response to Improvement Conditions 1 and 2 of your permit variation EPR/BV3715IL/V004. The intention of the improvement conditions was to ensure that all the emissions monitoring is carried out to MCERTS recognised standards. The methods listed in your table are all in accordance with Environment Agency guidance M18, although please can you ensure that you are analysing for Total Nitrogen as specified in the permit, and not Ammoniacal Nitrogen.

Your submission demonstrates that SCA will be meeting the MCERTS standards once the identified improvements have been implemented. A regular audit should be included in the site EMS to ensure that the methods are kept up to date.

Yours sincerely

Alison Soper
Regulatory Officer PPC/RSR
