### **Introductory note**

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

The Industrial Emissions Directive (IED) came into force on 7<sup>th</sup> January 2014 with the requirement to implement all relevant BAT conclusions as described in the Commission Implementing Decision. The production of pulp, paper and board BAT conclusions were published on 30 September 2014 in the Official Journal of the European Union following a European Union wide review of BAT.

This variation incorporates the changes required by the Industrial Emissions Directive following a statutory review of permits in the production of pulp, paper and board sector. This includes the amendment of the wording of several permit conditions relating to notifications and also includes the addition of a condition relating to a requirement for monitoring of groundwater and soil. At the same time the permit has been converted into the current EPR Permit format.

The scheduled activity reference for the onsite Effluent Treatment Plant in S1.1 has been amended from S5.3A(1)(c)(ii) to S5.4A(1)(a)(ii). This is as a result of the Environmental Permitting (England and Wales) (Amendment) Regulations 2013, which implements the Industrial Emissions Directive.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number
