Condition 2.10.1 requires the operator to carry out monitoring of air and sewer emissions at the methods and frequencies specified in the tables 2.2.2, 2.2.8 and 2.10.1 in the permit.

Condition 4.1.2 requires the reporting of the results from this monitoring within 28 days of the end of the reporting period as specified in Schedule 2 of the permit. All reporting should be submitted on the forms specified in Table S2 of the permit.

The Operator has submitted monitoring returns at the end of the year.

All results submitted were within permitted limits, used the methods (or otherwise agreed) specified in the permit, reported on the agreed forms and received within the reporting periods that are specified in the permit.

Every year CBL have to review their energy usage (condition 2.7.1) and fugitive releases. As a result CBL have a program of replacing equipment with more energy efficient items. The annual report for energy was received within the reporting periods that are specified in the permit.
