

Operator : Telsol Limited

Form Number : L1

Criteria	Description	Demonstration of Compliance
Raw materials:	The installation must not release more than 20 m ³ of water per day as waste water or effluent. No account need be taken of the volume of water exported from the installations as product.	382 m ³ of water was used during 2017. This information was obtained from the water bills. The company is therefore compliant.
Techniques to prevent and reduce waste arisings and emissions:	The installation must comply with the criteria in this guidance without having to rely on active abatement. In particular, releases must not be dependent on continuing or correct operation of equipment.	Remains the same as original application. The company is therefore compliant.
Waste Production:	The installation must not give rise to more than 1 tonne of controlled waste per day, averaged over a year, with not more than 20 tonnes being released in any one day. No more than 1% should be special waste.	No controlled waste was disposed of in 2017. The company is therefore compliant.
Energy Consumption:	The installation must not consume energy at a rate greater than either 1MW or, if the installation uses a combined heat and power installation to supply any internal process heat, 10 MW, or 3MW if fuelled by waste oil.	503,641 units (equivalent to 503,641 kWh) of electric and 147,671 kWh of gas used during 2017. This information was obtained from the electric and gas bills. The company is therefore compliant.
