Schedule

1. Please submit to Natural Resources Wales details of the odour emissions and controls from the on site layerage area and include details of the normal and maximum bird numbers that will be housed on site.
2. Please submit to Natural Resources Wales details of the ventilation and drainage from the module wash and vehicle wash areas, with reference to odour emissions and containment of effluent.
3. Please submit to Natural Resources Wales details of the odour emissions and controls for the exhaust from the vaccume pump system to be used on site.
4. Please submit to Natural Resources Wales a procedure for operations and repair in the event of a break down of the on site scrubber.
5. Please submit to Natural Resources Wales details of odour management for the blood tank, including details of where the air in this area will be treated and emitted from the site.
6. Please submit to Natural Resources Wales details of the system that will be used to clean and empty the blood tank, including reference to the management of odours.
7. Please submit to Natural Resources Wales details of the process controls for the scrubber with reference to how any operational problems with the potential to adversely affect odour emissions.
8. Please submit to Natural Resources Wales a details of oder containment, treatment and emissions from the Effluent Treatment Plant balance tank, divert tank, effluent sump, aeration tank, activated sludge tank, anoxic tank, DAF plant, solids skip, solids screen and shoot.
9. Please submit to Natural Resources Wales a description of the measures that will be in place, both physical and procedural, to prevent accidental releases of effluent to the River Dee. Such as through failure of an effluent storage tank. This might be made clearer with a site drainage plan which is overlaid with the locations of the on site activities.
10. Please describe the measures that will be in place to prevent birds or vermin from accessing materials in the solids screen and skip at the Effluent treatment Plant.
