

Permit with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Llysonnen Mill

Wynnstay Group plc
Travellers Rest
Carmarthen
Carmarthenshire
SA31 3SG

Permit number
EPR/EP3034GS

Llysonnen Mill

Permit number EPR/EP3034GS

Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

The installation is located at Travellers rest, Carmarthen covering an area of approximately 1.6 hectares with the centre of the site located at National Grid Reference SN 38295 19579.

The installation utilises bulk raw materials of vegetable origin to produce pellets or blends of meals for animal feed. Raw materials are accepted at the site in dry and liquid forms with dry materials being stored in bulk silos and liquids in blended storage tanks. Filters are used at the intake points to reduce the potential for atmospheric emissions during delivery.

The milling process blends, grinds, mixes and extrudes into pellets (if required) the raw materials which are blended to specific formulas (steam, molasses and liquids are added if necessary).

Pelletising of the mixes into pellets, nuts or rolls occurs through one of two processing lines. After the feed, has been formed in the presses air is drawn down to cool the feed using one of two coolers. Air from each cooler is expelled through cyclone abatement systems which are monitored for particulate emissions on an annual basis. The finished product is transferred for bulk storage and subsequent sale.

The main process is also supported by ancillary activities which include steam generation, compressed air generation, effluent treatment, cleaning and vehicle washing.

All processes which are likely to produce dust and noise emissions are undertaken in buildings or sheltered units fitted with dust suppression systems where appropriate. A management system is in place that covers all aspects of site operations which could impact on the environment.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number
EPR/EP3034GS

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/EP3034GS/V003 authorising,

Wynnstay Group plc (“the operator”),

whose registered office is

**Eagle House
Llansantffraid ym Mechain
Powys
SY22 6AQ**

company registration number **02704051**

to operate an installation at

**Llysonnen Mill
Travellers Rest
Carmarthen
Carmarthenshire
SA31 3SG**

to the extent authorised by and subject to the conditions of this permit.

Signed	Date
	19/02/2018

Anna Lewis, Principal Permitting Officer
Authorised on behalf of Natural Resources Wales

1 Management

1.1 General management

1.1.1 The operator shall manage and operate the activities:

- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
- (b) using sufficient competent persons and resources.

1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.

1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

1.2.1 The operator shall:

- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
- (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
- (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

1.3.1 The operator shall:

- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
- (b) maintain records of raw materials and water used in the activities;
- (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
- (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

1.4.1 The operator shall take appropriate measures to ensure that:

- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
- (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and

- (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.
- 1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1
 - (a) *For the following activities referenced in schedule 1, table S1.1 (A1 to A7).* The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by Natural Resources Wales.
 - (b) If notified by Natural Resources Wales that the activities are giving rise to pollution, the operator shall submit to Natural Resources Wales for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.
- 2.3.2 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.4 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
 - (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.
- 2.3.5 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by Natural Resources Wales.
- 2.4.2 Except in the case of an improvement which consists only of a submission to Natural Resources Wales, the operator shall notify Natural Resources Wales within 14 days of completion of each improvement

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1, S3.2.
- 3.1.2 The limits given in schedule 3 shall not be exceeded.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
 - (a) if notified by Natural Resources Wales that the activities are giving rise to pollution, submit to Natural Resources Wales for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Monitoring

- 3.3.1 The operator shall, unless otherwise agreed in writing by Natural Resources Wales, undertake the monitoring specified in the following tables in schedule 3 to this permit:
 - (a) point source emissions specified in table S3.1 and S3.2
- 3.3.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continual), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.

- 3.3.3 Monitoring equipment, techniques, personnel and organisations employed for the emissions monitoring programme specified in condition 3.3.1 shall have either MCERTS certification or MCERTS accreditation (as appropriate), where available, unless otherwise agreed in writing by Natural Resources Wales.
- 3.3.4 Permanent means of access shall be provided to enable sampling/monitoring to be carried out in relation to the emission points specified in schedule 3 tables S3.1 unless otherwise agreed in writing by Natural Resources Wales.

3.4 Odour

- 3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of Natural Resources Wales, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.
- 3.3.3 The operator shall:
- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution outside the site due to odour, submit to Natural Resources Wales for approval within the period specified, an odour management plan which identifies and minimises the risks of pollution from odour;
 - (b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

3.5 Noise and vibration

- 3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of Natural Resources Wales, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.
- 3.4.2 The operator shall:
- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution outside the site due to noise and vibration, submit to Natural Resources Wales for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;
 - (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

3.6 Pests

- 3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests' management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

- 3.6.2 The operator shall:
- (a) if notified by Natural Resources Wales, submit to Natural Resources Wales for approval within the period specified, a pests' management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;
 - (b) implement the pests' management plan, from the date of approval, unless otherwise agreed in writing by Natural resources Wales

4 Information

4.1 Records

- 4.1.1 All records required to be made by this permit shall:
- (a) be legible;
 - (b) be made as soon as reasonably practicable;
 - (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
 - (d) be retained, unless otherwise agreed in writing by Natural Resources Wales, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.
- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by Natural Resources Wales.

4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to Natural Resources Wales using the contact details supplied in writing by Natural Resources Wales.
- 4.2.2 *For the following activities referenced in schedule 1, table S1.1 (A1 to A7.)* A report or reports on the performance of the activities over the previous year shall be submitted to Natural Resources Wales by 31 January (or other date agreed in writing by Natural Resources Wales) each year. The report(s) shall include as a minimum:
- (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
 - (b) the annual production /treatment data set out in schedule 4 table S4.2; and
 - (c) the performance parameters set out in schedule 4 table S4.3 using the forms specified in table S4.4 of that schedule.
- 4.2.3 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by Natural Resources Wales, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:
- (a) in respect of the parameters and emission points specified in schedule 4 table S4.1;

- (b) for the reporting periods specified in schedule 4 table S4.1 and using the forms specified in schedule 4 table S4.4; and
 - (c) giving the information from such results and assessments as may be required by the forms specified in those tables.
- 4.2.4 The operator shall, unless notice under this condition has been served within the preceding four years, submit to Natural Resources Wales, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

- 4.3.1 (a) In the event that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
- (i) inform Natural Resources Wales,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) in the event of a breach of any permit condition the operator must immediately—
- (i) inform Natural Resources Wales, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) in the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.
- 4.3.2 Any information provided under condition 4.3.1(a)(i), or 4.3.1 (b)(i) where the information relates to the breach of a limit specified in the permit, shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.
- 4.3.3 Where Natural Resources Wales has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform Natural Resources Wales when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to Natural Resources Wales at least 14 days before the date the monitoring is to be undertaken.
- 4.3.4 Natural Resources Wales shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:
- Where the operator is a registered company:
- (a) any change in the operator's trading name, registered name or registered office address; and
 - (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.
- Where the operator is a corporate body other than a registered company:
- (a) any change in the operator's name or address; and
 - (b) any steps taken with a view to the dissolution of the operator.

- 4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:
- (a) Natural Resources Wales shall be notified at least 14 days before making the change; and
 - (b) the notification shall contain a description of the proposed change in operation.
- 4.3.6 Natural Resources Wales shall be given at least 14 days' notice before implementation of any part of the site closure plan.
- 4.3.7 Where the operator has entered into a climate change agreement with the Government, Natural Resources Wales shall be notified within one month of:
- (a) a decision by the Secretary of State not to re-certify the agreement;
 - (b) a decision by either the operator or the Secretary of State to terminate the agreement; and
 - (c) any subsequent decision by the Secretary of State to re-certify such an agreement.

4.4 Interpretation

- 4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.
- 4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "without delay", in which case it may be provided by telephone.

Schedule 1 - Operations

Table S1.1 activities

Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
A1	S6.8 Part A (1)(d)(ii) Treatment and processing of vegetable raw materials whether previously processed or unprocessed, intended to produce feed with a finished product production capacity greater than 300 tonnes per day.	Production of animal feeds	From receipt of raw materials to dispatch of final product.
Directly Associated Activity			
A2	Operation of abatement systems	Operation of abatement systems for the control of emission to air	Operation, maintenance and control of abatement.
A3	Steam Generation	Boiler fuelled by Kerosene used to generate steam on-site	From receipt of water to generation of steam and emissions of combustion gases
A3	Fuel/Oil Storage	3,000 litres red diesel storage tank. 10,000 litre road diesel storage tank. 10,000 litre kerosene storage tank.	Includes fuel/oil receipt, storage and off-loading.
A4	Air Compression	Generation of compressed air on-site to deliver powder meal products via overhead pneumatic blow lines.	From receipt of air to discharge of compressed air to feed mill.
A5	Vehicle Cleaning	Provision of vehicle cleaning facilities.	Operation of vehicle cleaning facilities and discharge of wash water to underground storage tank.
A6	Effluent Treatment	Operation of effluent treatment plant to treat all process and foul effluent.	From generation of process and foul effluent at the installation to discharge of treated effluent to surface water.
A7	Waste handling and Storage	Storage and handling of wastes produced at the site.	From generation of waste to dispatch of waste materials from site.

Table S1.2 Operating techniques

Description	Parts	Date Received
Application	The response to section B5-B9 in the application	29/09/09
Additional Information	Odour Management Plan	28/10/09
Additional Information	Changes to vehicle wash area including revised site drainage plan, drawing No. 129-01-01-08. D007. Revision A	11/01/10
Additional Information	Revised site drainage drawing No. 129-01-01-08. D007. Revision B	18/05/10
Additional Information Received	Revised Installation boundary drawing No. 129-01-01-08. D004. Revision B	11/06/10
Application	Drawing no. 129-01-08. d01 – proposed permit boundary Rev A	01/12/17
Application	Drawing no. 129-01-09.DO8 – Wynnstay drainage scheme ARM design rev 1	01/12/17
Application	6922 NRW Supporting docs for permit variation	01/12/17

Table S1.3 Improvement programme requirements

Reference	Requirement	Date
IC1	<p>A written report shall be submitted to Natural Resources Wales for approval, detailing the results of a survey to determine the integrity, adequacy and suitability of existing hardstanding, kerbing and secondary containment and bunding for above and below ground structures and the measures to comply with the requirements of '<i>How to comply with your environmental permit(EPR1.00) and the Food and Drink Technical Guidance Note (EPR 6.10)</i>'.</p> <p>This shall include but not be limited to an inspection and maintenance program for all relative equipment identified. Where appropriate the report shall contain timetabled dates for implementation of individual measures. You must implement the plan from the date of approval in writing by Natural Resources Wales.</p>	06/08/2018
IC2	Full details relating to the design and performance of the 'ARM Reed bed and Septic Tank system' shall be submitted to Natural Resources Wales for approval, following submission of the final plans. As part of this, the operator shall provide an up-to-date site plan showing the final location of the 'W1' emission point.	06/08/2018
IC3	Full details for the proposed design of the lorry wash water recirculation system shall be submitted to Natural Resources Wales for approval following completion of the design.	06/08/2018
IC4	The operator shall submit a written report to Natural Resources Wales for approval. The report shall assess the condition and integrity of kerosene storage and associated equipment such as pumps and connection lines in-line with GPP2 – Above ground oil storage tanks. The report will include an action plan and timescales for implementing improvements identified. You must implement the plan from the date of approval in writing by Natural Resources Wales.	06/08/2018
IC5	The operator shall review the operating techniques in Table S1.2 of this permit in-line with 'how to comply' guidance, Technical Guidance Note M18, Food & Drink sector guidance EPR6.10 and any other guidance relevant to the operations carried out on-site to ensure that the operating techniques are still relevant and up-to-date. A report will be submitted to NRW for approval.	06/08/2018

Schedule 2 - Waste types, raw materials and fuels

Table S2.1 Raw materials and fuels

Raw materials and fuel description	Specification
Kerosene – storage capacity 10,000 litres	-

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements

Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference period	Monitoring frequency	Monitoring standard or method
A1 (Point A1 on site plan in Schedule 7)	Cyclone Exhaust	Particulate Matter	50mg/m ³	Hourly average	Annual	BS EN 13284-1
A2 (Point A2 on site plan in Schedule 7)	Cyclone Exhaust	Particulate Matter	50mg/m ³	Hourly average	Annual	BS EN 13284-1
A3 (Point A3 on site plan in Schedule 7)	Boiler Plant		No Monitoring Required			
A4 (Point A4 on site plan in Schedule 7)	Bulk Intake Extraction Unit		No Monitoring Required			

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements

Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
W1 (on site plan in Schedule 7)	Process, Surface Water and Foul Effluent	Total Suspended Solids (TSS)	15 mg/l	For 95% of all measured values of periodic samples taken over one month	Weekly for the first 3 months following commissioning of the Effluent Treatment Plant then monthly thereafter	BS EN 872
		pH	5.0-8.5	Periodic		BS6068-2.50
		BOD (5 day)	10 mg/l	Periodic		BS EN 1899-1:1998
		Flow	53m ³ /day No flow in dry weather conditions	Periodic		Calibrated apparatus approved in writing by Natural Resources Wales.

Schedule 4 - Reporting

Parameters, for which reports shall be made, in accordance with conditions of this permit, are listed below.

Table S4.1 Reporting of monitoring data

Parameter	Emission or monitoring point/reference	Reporting period	Period begins
Emissions to air Parameters as required by condition 3.5.1.	A1, A2	Annual	01/07/10
Emissions to water Parameters as required by condition 3.5.1.	W1	Annual	01/07/10

Table S4.2: Annual production/treatment

Parameter	Units
Animal Feed	tonnes

Table S4.3 Performance parameters

Parameter	Frequency of assessment	Units
Water usage	Annually	Litres per tonnes of product
Energy usage	Annually	MWh per tonne of product
Waste Produced	Annually	tonnes

Table S4.4 Reporting forms

Media/parameter	Reporting format	Date of form
Air	Form air 1 or other form as agreed in writing by Natural Resources Wales	30/06/10
Water and Land	Form water 1 or other form as agreed in writing by Natural Resources Wales	30/06/10
Water usage	Form water usage 1 or other form as agreed in writing by Natural Resources Wales	30/06/10
Energy usage	Form energy 1 or other form as agreed in writing by Natural Resources Wales	30/06/10
Animal Feed Produced	Form performance 1 or other form as agreed in writing by Natural Resources Wales	30/06/10
Waste produced	Form performance 1 or other form as agreed in writing by Natural Resources Wales	30/06/10

Schedule 5 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any activity that gives rise to an incident or accident which significantly affects or may significantly affect the environment	
To be notified Immediately	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a permit condition	
To be notified immediately	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) In the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment:	
To be notified immediately	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the Operator

Schedule 6 - Interpretation

“accident” means an accident that may result in pollution.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by Natural Resources Wales under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.675 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission limit.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions

“MCERTS” means the Environment Agency’s Monitoring Certification Scheme.

Pests” means Birds, Vermin and Insects.

Where a minimum limit is set for any emission parameter, for example pH, reference to exceeding the limit shall mean that the parameter shall not be less than that limit.

Unless otherwise stated, any references in this permit to concentrations of substances in emissions into air means:

- (a) in relation to emissions from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels, 6% dry for solid fuels; and/or
- (b) in relation to emissions from non-combustion sources, the concentration at a temperature of 273K and at a pressure of 101.3 kPa, with no correction for water vapour content.

Schedule 7 - Site plan

END OF PERMIT
