David,

I agree to the trial use of 100te BOS Filter Cake as an alternative raw material at Padeswood for the period 1st July - 31st July 2013 in accordance with the conditions (excluding periodic emissions monitoring) of my letter dated 8th June 2012.

Regards,

Stuart Ross

Hi David

Is the proposed material the same spec as that which your previous emissions assessment was based upon?

Thanks

Stuart

Stuart,

As a correction to the paragraph below, we will of course be carrying out continuous emissions monitoring at Point A8. What I am asking that we do not do is the periodic emissions testing carried out by a third party during the limited use of this material. I apologise for the error and hope it did not cause too much confusion.

Regards

dq

Stuart,

Further to our recent conversation you are aware that we did not have the opportunity to conduct a brief trial of iron oxide as detailed in your letter of 8th June 2012. I am writing to ask if we may carry out the trial as previously requested/proposed with the only difference being that we will not be carrying out continuous emissions testing at point A8. The trial will be limited to 100t only and will be conducted between 1/7/13 and 31/7/13. The purpose of the trial is to prove our material handling system and show that the material has the desired effect on our raw mix chemistry.

I look forward to your response,

regards

Nick,

As discussed, please find attached a letter approving the trial use of BOS filter cake at Padeswood.

If you would like to discuss anything further please do not hesitate to contact me.

Regards,

Stuart Ross
