Dear David

**Re. Use of Alternative Raw Materials (Padeswood) – Filter Dust**

I am writing to you following your request to use up to 60 tonnes per day of filter dust (EWC 01 01 10) as an alternative raw material. This material has been derived from Hanson's asphalt operations at Criggion and Penmaenmawr Quarries.

Permit condition 2.3.9 requires that you gain written approval from Natural Resources Wales for the use of waste as an alternative raw material and that it meets the specification set out in Table S2.1.

I have reviewed the information provided and agree that the material meets the requirements of the permit and may be used on site.

If filter dust is sourced from other Hanson quarries your risk assessment should be reviewed (as developed for use with the MPA Code of Practice). Records of any such review should be retained and available for inspection.

Yours sincerely

Stuart Ross
