**Subject:** Part B action 13/10/14

Stuart,

I can confirm that the preventative action identified on the Part B submission dated 13/10/14 relating to NOx control as described below has been completed.

"As a response to this a warning message will flag up on screen after SNCR has been non-operational for three hours or more. This will ask operators to review set point with Shift Manager for remainder of the day. A lower target will be set if required to reduce emissions."

Regards

David
