Ref No: SHLNG/ENV/C/039

Date: 10th September 2008

Dear Mark,

South Hook LNG Environmental Permit XP 3538 LD - Condition 1.6.1 D

Please find enclosed two separate reports which fulfil Condition 1.6.1 D of South Hook's Environmental Permit XP 3538 LD. These reports provide details on the Application Site Report, and the Site Protection and Monitoring Plan.

As discussed at earlier meetings, these reports would normally be provided earlier in the permitting process, but in the case of South Hook it was agreed that we should defer these reports until full details of the site remediation results were available.

We will be pleased to provide any clarification required during the Agency's review of these documents.

Yours sincerely,

Dr Shane Evans
Acting Environmental and Quality Manager
South Hook LNG Terminal Company Ltd
