### Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

## Section 2 – Compliance Assessment Report Detail

This section contains a report of our findings and will usually include information on:

- The part(s) of the permit that were assessed (eg. Maintenance, training, combustion plant, etc)
- Where the type of assessment was 'Data Review' details of the report/results triggering the assessment
- Any non-compliances identified
- Any non-compliances with directly applicable legislation
- Details of any multiple non-compliances
- Information on the compliance score accrued inc.
- Details of advice given
- Any other areas of concern
- Any actions requested
- Any examples of good practice
- A reference to photos taken

Natalie Wrangham and Simon Worrall attended site 28/05/2019. No signs of effluent around septic tank, no smell.

Unable to get to the monitoring point (NGR ST 16205 83290) because area was very overgrown (see below)

### **Action**

The Permit Holder was advised in October 2017 of the same issue - that the monitoring point needed to be accessible and the vegetation leading to and around the point should be cleared. No warning was issued at this time. As the same issue is evident at this visit, I have issued a warning.

Permit Holder needs to clear path to monitoring point so that they are in compliance with their permit and it can be inspected. I recommend that this is done once the bird nesting season is over at the end of August / beginning of September. NRW should be

notified once the work has been completed.
