Re: 2014 Paint shop VOC data - Qtr1, Qtr2, Qtr3 and Qtr4

Dear Beth,

As promised in my email of 3rd February, we have now reviewed our quarterly paint shop VOC emission reports in line with the revised manufacturer's data. The impact of the changes was not as dramatic as we had feared, but has made some difference to the data. In addition, it was noticed that as the year progressed some revisions had been made retrospectively to the reported volume of material consumed.

I have attached revised reporting submissions, for all four quarters of 2014, which take into account all changes to the data. Annual VOC emission from gun-wash remains unchanged at 35,827.5Kg. Annual emission of VOC from other paint-shop materials has actually reduced by 559.26Kg (from 96,086.16Kg to 95,526.9Kg). This is mainly due to a spreadsheet error which over-calculated the Stringer data in Quarter 2.

Should you have any further questions please do not hesitate to contact me.

Yours sincerely,

Andy Denton
Environment Officer
Airbus Operations, Broughton
