Re: De-Commissioning of Hawker Paint Shop

Dear Beth,

Further to our letter dated 1st August 2013, we can confirm that the Hawker Paint shop has been completely decommissioned and the structure of the paint booths and associated elements have been removed from site.

The following emission points are no longer applicable to the environment permit:

A48 – A54 Hangar 91 – spray booth and paint mix

Therefore, the quarterly mass balance submission for the VOC emissions will no longer include a line item for Hangar 91 / Hawker.

This will also be reflected in the EP-OPRA and other end of year reporting.

Should you have any further questions please do not hesitate to contact me.

Yours sincerely,

Peter Shephard
Environment Officer
Airbus Operations, Broughton
