With reference to the graphs / reports normally submitted for Continuously Monitored Emissions to Air A2 to A8 for the above installation

For the period ending 30th April 2013, I have no report or graphs to submit due to the Boiler and CEMS unit being shutdown.

As previously reported due to problems with combustion in the Boiler, we shutdown on 22nd March to carry out remedial work. After investigation and despite all efforts the volume of work was such that our plans to restart did not occur leading us into commencing our April planned shutdown early.

As of 1st May the Boiler work has been completed and we are currently waiting for work to be completed on the Steam Turbine. We have commissioned the boiler on gas but as yet have not used any solid fuel.

If you require any further explanation of the above please let me know.

Best Regards

Kevin Smith
