Please find enclosed graphs / reports for Continuously Monitored Emissions to Air A2 to A8 for the period ending 31st July 2014.

During the period there were no actual exceedances to report.

You will note that on 21st July there was a day with no values, this occurred during an unplanned shutdown of the Boiler.

There is also 2 occasions on the 30th and 31st July when invalid data was reported this was during stable combustion of the Boiler and during routine maintenance of the CEMs system. As a result a total of 2 ½ hours downtime will be added to the annual CEMs shutdown log

If you require any further information please let me know

Best Regards

Kevin Smith
Utilities Manager
UPM (UK) Shotton
