RE: SHOTTON WORKS PERMIT; Q2 RETURNS JULY – SEPTEMBER 2014

Please find attached Quarter 3 returns for our site permit BR7321, for the period July - September 2014.

Form W1, Reporting of emissions to water (other than to sewer)

Yours sincerely

Peter Shephard
Senior Energy & Environment Officer

Permit Reference Number: BR7321

Operator: Tata Steel UK Limited

Installation: Tata Steel Colors Shotton Works

Form Number: W1 (Page 1 of 3)

Reporting of Emissions to Water (other than to Sewer) for the period from ...29/06/14....to....30/09/14

Emission Point	Substance / Parameter	Emission Limit Value	Result ^[1]	Test Method ^[2]	Sample Date and Times ^[3]	Accreditation/ Certification ^[4]	Uncertainty ^[5]
W1	Flow	15,000 m ³ /day	Mean	Magnetic flow meter	100%	UKAS Lab	3.7%
			Max	Magnetic flow meter			
	pH	5 - 9	Min	Glass electrode laboratory pH meter	8am Every morning	UKAS Lab	+/- 0.12
			Max				
	Suspended solids	100 mg/l	Mean	Gravimetric /Filtering/Balance	8am Every morning	UKAS Lab	+/- 2.1mg/l
			Max				
	Chemical Oxygen Demand	200 mg/l	Mean	Colorimetric - Hach Spectrophotometer	8am Every morning	UKAS Lab	+/- 1.2mg/l
			Max				
	Iron	10 mg/l	Mean	Laboratory ICP	8am Every morning	UKAS Lab	+/- 0.1mg/l
			Max				

[1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum - maximum' measured values.

[2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. colorimetry.

[3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements, or flow/time proportional samples, the percentage of the process operating time covered by the monitoring is given.

[4] The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.

[5] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated. The following uncertainties are quoted on a different basis (basis as stated) - {The basis of any other uncertainty figure needs to be stated. Where no figure is available the Agency will need to agree an appropriate uncertainty value.}
