RE: Application for Consolidation and Variation; Environmental Permit BR7321 – Shotton Works

To whom it may concern,

I hereby request that the following changes are made to the Environmental Permit BR7321:

- All exchange of letters and minor variations to BR7321 since the permit was issued to be consolidated, including the variations attached to this letter (summarised below).
- The details of operation for ColorCoat 1 line (specifically, updating Annex 6 of the original PPC application) to be updated with drawings and descriptors as detailed.
- The Effluent Treatment Plant, previously a Directly Associated Activity, to be made an element of the Permit; Annex 12 of the original PPC application to be updated with drawings, treatment chemistry and descriptors as detailed.

This request is made following discussions with our Site Permitting Officer, Matthew Kelk, based in Buckley, North Wales, regarding changes to our site operations.

The submission is made up of a physical copy of the documents, and a CD with electronic copies of documents.
