**Attn: Guy Baskerville**

Dear Guy,

**Re: EAWML30058 and DP3733BK – Docksway Disposal Site. Latest Area 1 and 2 Surface Water Monitoring Results, Round 214.**

We write to provide details of the results of surface water monitoring undertaken at Docksway Disposal Site in December 2021 (Round 214).

With this letter report we enclose summary tables giving field observations and selected field test results for each of the surface water positions. The analytical certificates for the laboratory testing carried out during this monitoring round are included with this report.

Surface water sampling was carried out at four locations during Round 214, see Table 1 below.

**Table 1** Details of Locations Sampled during Round 214

Position Monitored	Location
SW1A	River Ebbw Upstream
SW23	Discharge to Maes Glas Pill from Docks Drain Outfall (Disused Culvert)
SW24	Oxbow Lake Position 1
C3_Asb	Cell 3 settling lagoon

Note: SW02 and SW7 were not monitored during this round due to unsafe access and SW25 and SW26 were not monitored as they were recorded to be dry.

### Surface Water Quality Assessment

Table 2 below shows selected testing results for Round 214. There are no compliance limits set for surface water and therefore there is no commentary regarding the results.

**Table 2** Testing Results Summary for Round 214

Monitoring Location	Field Temperature (°C)	Lab pH	Ammoniacal Nitrogen (mg/l)	Field Dissolved Oxygen (%)	BOD (mg/l)	Suspended Solids (mg/l)	Chemical Oxygen Demand (mg/l)
SW1A	7.3	8.21	<0.2	95.9	<1	-	<7
SW23	10.9	7.51	19.6	64.1	<1	-	61.4
SW24	5.3	8.14	<0.2	86.0	<1	-	20.1
C3_Asb	5.6	8.09	2.76	69.7	<1	3.25	92.9

The field operative did not record the presence of a sheen during sampling at C3\_Asb and the laboratory also did not detect asbestos fibres in the sample. The surface water quality within C3\_Asb was also within the permit limits during Round 214 for the parameters tested.

#### Concluding Remarks

Newport City Council (NCC) will continue to monitor the surface water quality on and around Docksway Disposal Site in accordance with the aftercare monitoring plan for Area 1, the Environmental Permit, and in accordance with the relevant discharge consent limits. Stantec will continue to provide comment on water quality with reference to point source emission limits to water (Table S3.2 of the Permit), and discharge consent limits within subsequent reports.

If you have any questions regarding the investigations carried out or the data herein, then please do not hesitate to contact us.

Yours sincerely,

**Kate Riley**  
**Senior Associate**  
 on behalf of Stantec UK Ltd
