OL

Liam,

Thanks for the additional photos. From the information submitted I can now say that I am satisfied that the proposals should not pose a risk to the geomorphology of the reach. All I would add is my usual that no additional work outside of those shown is undertaken, the natural boulders within the watercourse remain in situ except where absolutely necessary (i.e. underneath the footprint of the intake), and the weir is backfilled with clean material.

Many thanks,
Oly

Hi Oliver,

As per the suggestion in the response letter (attached for ease of reference), I've been back to this site and taken better pictures of the intake using a wide angle lens (Pages 3, 4, 10 & 11). I've also added photos of two other sites in the immediate vicinity of the intake which have existing flat sections/pools (Page 5). Let me know if any other information would be useful.

Kind regards,

Liam
