Introductory note

This introductory note does not form a part of the Variation Notice.

The following Notice is issued under Regulation 17 of The Pollution Prevention and Control (England and Wales) Regulations 2000 (S.I.2000 No. 1973 (as amended) (the Regulations) to vary the conditions of a Permit issued under the Regulations to operate an installation.

The Notice comprises Schedule 1 containing conditions to be deleted, Schedule 2 conditions to be amended and Schedule 3 conditions to be added. The Notice is subject to the express conditions set out in Schedules 1 to 3.

The Permit, as amended by this Variation Notice, contains conditions which have to be complied with. It should be noted that aspects of the operation of the installation which are not regulated by those conditions are subject to the condition implied by Regulation 12(10) of the PPC Regulations, that the Operator shall use the best available techniques for preventing or, where that is not practicable, reducing emissions from the installation. Techniques include both the technology used and the way in which the installation is designed, built, maintained, operated and decommissioned.

Brief description of process

Dansco Dairy Products Limited operate a milk processing facility at Aberarad producing exclusively Mozzarella cheese for predominantly the UK and European pizza markets. The installation accepts 140 million litres of milk per day which is calculated to be in excess of the 200 tonnes per day threshold given in Section 6.8 A(1)(e) of the PPC Regulations 'treating and processing milk...'. The applicant has completed an H1 assessment of the emissions from the installation and concludes that there is one significant release to air, which also contributes to a significant release to land through deposition, from the boiler stack: Nitrogen dioxide at 1.21% of the EAL. There is one significant release to water, nitrite, at 1.56% of the short term EAL only. There is one SAC within 10km, Afon Teifi which is 339m from the installation and one SSSI within 2km, Old Cilgwyn And Cae Heslop which is 867m from the installation. It is not anticipated that either designated site will be affected by the activities undertaken on the installation.

Brief description of the changes introduced by this variation notice.

This variation notice extends the due date for the Site Protection and Monitoring Plan from the 3rd January 2006 to the 31st January 2006

Other PPC Permits relating to this installation

Permit holder	Permit Number	Date of Issue

Superseded Licenses/Consents/Authorisations relating to this installation

Holder	Reference Number	Date of Issue
Dansco Dairy Products Ltd	BP0153701 (discharge consent)	02/10/92

Talking to us

If you contact the Agency about this Permit please quote the Permit Number.

The Operator should use the Emergency Hotline telephone number (0800 80 70 60) or any other number notified to it to give a notification under condition 5.1.1 of the Permit.

Confidentiality

The Permit/Variation requires the Operator to provide information to the Agency. The Agency will place the information onto the public registers in accordance with the requirements of the PPC Regulations. If the Operator considers that any information provided is commercially confidential, it may apply to the Agency to have such information withheld from the register as provided in the PPC Regulations. To enable the Agency to determine whether the information is commercially confidential, the Operator should clearly identify the information in question and should specify clear and precise reasons.

Variations to the permit

This Permit may be varied in the future. The Status Log within the Introductory Note to any such variation will include summary details of the Permit, variations issued up to that point in time and state whether a consolidated version of the Permit has been issued.

Surrender of the permit

Before this Permit can be wholly or partially surrendered, an application to surrender the Permit has to be made. For the applicant to be successful, they would have to be able to demonstrate to the Agency, in accordance with Regulation 19 of the PPC Regulations, that there is no pollution risk and that no further steps are required to return the site to a satisfactory state.

Transfer of the permit or part of the permit

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by both the existing and proposed holders, in accordance with Regulation 18 of the PPC Regulations. A transfer will be allowed unless the Agency considers that the proposed holder will not be the person who will have control over the operation of the installation or will not ensure compliance with the conditions of the transferred Permit. If the Permit authorises the carrying out of a specified waste management activity, then there is a further requirement that the transferee is considered to be a "fit and proper person" to carry out that activity.
