

## Schedule 6 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

### Part A

Permit Number	BR9383ID	Notification Reference	EP_EX_131
Name of operator	Knauf Insulation Ltd		
Location of Facility	Chemistry Lane, Queensferry, Deeside, Flintshire, CH5 2DA		
Time and date of the detection	The day of 13 <sup>th</sup> March 2014		

<b>(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or fugitive emission which has caused, is causing or may cause significant pollution</b>	
<b>To be notified within 24 hours of detection</b>	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

OK FOR PUBLIC REGISTER	INITIALS	DATE
	AS	19/03/14
COPIED TO PUBLIC REGISTER	JB	E02M

<b>(b) Notification requirements for the breach of a limit</b>	
<b>To be notified within 24 hours of detection unless otherwise specified below</b>	
Emission point reference/ source	Cupola Furnace Main Stack (Emission Point A)
Parameter(s)	Carbon Monoxide
Limit	Daily Average 80mg/Nm <sup>3</sup> @8%O <sub>2</sub> Dry Gas
Measured value and uncertainty	The Daily Average CO emission is estimated as 107mg/Nm <sup>3</sup> @8%O <sub>2</sub> Dry Gas. Uncertainty 10% Not Deleted (Deletion Not Allowed by Permit).
Date and time of monitoring	The day of 13 <sup>th</sup> March 2014
Measures taken, or intended to be taken, to stop the emission	High CO emissions unusually occurred whilst the plant was on hold for several hours. Following the major refurbishment work undertaken on the Enetex flue gas treatment plant, during the Christmas shut down period, the set-up of the burner is not yet optimised when the plant is on hold for prolonged periods.  Fine tuning of the burner setting is being undertaken during hold periods in order to resolve this issue.

<b>Time periods for notification following detection of a breach of a limit</b>	
Parameter	Notification period

<b>(c) Notification requirements for the detection of any significant adverse environmental effect</b>	
<b>To be notified within 24 hours of detection</b>	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling
