Subject: Withdrawal of Schedule 6 Part A Notification Referenced as EP_EX_135 (Permit No BR9383ID)

Dear Alison

I submitted a Part A Notification (EP_EX_135) on 19th June in relation to a CO Daily Average exceedance on 19th June. The Daily Average CO emission was estimated at 89mg/Nm³@8%O₂ Dry Gas, however, upon further investigation, it has been identified that the original data reviewed encompassed a period when the plant was still off-line, which gave false readings. Therefore, upon review of the data again for the plant start-up following the planned plant shutdown, the Daily Average CO emission was actually 63.79mg/Nm³@8%O₂ Dry Gas.

Therefore, I would like to withdraw EP_EX_135 please.

Please let me know if you require any further information or if there is a withdrawal procedure that I need to follow.

Kind regards, Claire
