Any more accurate information on the matters for notification under Part A.	Breach of limits for Particulate Matter and Ammonia during extractive monitoring undertaken on Emission Point G (Cooling Zone) on 24 <sup>th</sup> October 2013 and reported by the monitoring contractor on 20th November 2013 upon receipt of the laboratory analytical results.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	Previous testing has shown breaches in emission limits from Point G and investigations have shown that the abatement is not adequate to control emissions since the increase in production. Improvement work is planned to resolve this for which, a detailed proposal will be submitted to NRW for review and until the implementation of the design improvements, agreement has been reached with NRW to suspend the score. However, in the interim, continual cleaning and maintenance works have been undertaken and it is apparent that improvement has been achieved as previous results have been above 20 mg/Nm <sup>3</sup> . Emissions from Point G will be re-tested once the improvement work has been completed.
