### 4. Entitlement to apply (only required for abstraction licence applications)

Does the applicant have a legal right of access to the point of abstraction?

Has a right of access

Has an expected right of access

Owner/occupier of land

Date these access rights are expected

N/A

For formal abstraction licence applications where you are the landowner/occupier, provide a map with the land boundary and all abstraction and discharge point(s) marked. Please tick here to show that you have done this.

For expected rights of access, please also provide the additional evidence as outlined in Guidance Note WRX. Please tick here to show that you have done this.

## 5. Application reference number

Have you undertaken a pre-application enquiry or had any previous discussions with us?

## 8. Proposal summary

Please provide an outline of your proposal as described in Guidance Note WRX, including any sketches. If you are submitting a pre-application enquiry, this must include the quantities of water you propose to abstract. If necessary continue on a separate sheet and tick here to show that you have done this.

A 34kW hydropower scheme is proposed. This will be a grid connected scheme. The penstock will be approximately 949 metres long with a diameter of 280mm made from High Performance Polyethylene (HPPE), running from a concrete weir with a 2mm spaced coanda screen to the power house which will be next to watercourse. The turbine type proposed is a turgo. The turbine would be turned on and off automatically depending on the water level in the intake chamber. The flow rate, and hence the turbine power, would be modulated using a spear valve on the turbine nozzle.

A 'hands off flow' (HOF) notch will be incorporated in the intake weir and until the HOF has been satisfied, no water will be abstracted. In addition to this the proportional take, in excess of the HOF, is proposed to be 70% and this will be ensured by the screen's width being 70% of the full weir crest's width.

The site's gross head is 92.4m, net head 88.9m.

It is intended that abstraction take place all year round.

Maximum instantaneous flow (Design flow): 49 l/s

Max hourly abstraction (Design flow x 3600 sec): 176.4 cubic metres

Max daily abstraction (Max hourly abstract x 24h): 4,233.6 cubic metres

Max Annual abstraction (Max Daily Abstraction x 365 days): 1,545,264 cubic metres

### Application Checklist

Please tick the following checklist items to indicate that you have included the required information. If any sections of the form are left blank and no supporting information submitted, where we have insufficient information to make a decision on your application, we will return your application to you.

#### Essential:

Letter of authorisation from the applicant, allowing the agent to act as signatory   
Map showing the land ownership boundary with all abstraction and discharge point(s) clearly marked

#### Where relevant:

Evidence of negotiations of expected access rights, if applicable   
For groundwater abstractions, results of pump test (if not previously submitted)
