|                                                                            |                                                                                                                                                                     |
|----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Substances Emitted Which May Cause Harm</b>                             | Solids                                                                                                                                                              |
| <b>Emission:</b>                                                           | Time: 23.04hrs to 01.04hrs<br>Date: 22/07/2014- 23/07/2014<br>Location: Emission point W1, waste water discharge point                                              |
| <b>Authorised Emission Limit for this Emission Point</b>                   | 250 mg/m <sup>3</sup>                                                                                                                                               |
| <b>Estimate of Emission Quantity or Rate and Duration of the Emission:</b> | 535.8m <sup>3</sup> discharged over a two hour period from 23.04hrs to 01.04hrs with an average solid content of 262mg/m <sup>3</sup>                               |
| <b>Environmental Medium into Which the Emission Took Place</b>             | Water                                                                                                                                                               |
| <b>Measures Taken (or Intended to be Taken) to Stop the Emission</b>       | Pre-discharge sample analysis indicated that the solid content was within emission limits. Emission was not stopped. Composite sample analysed following discharge. |
