For the attention of Julia Frost

Dear Julia,

Please find attached the Q2 VOC's report as required by **Reference Permit**
EPR/BU7545IM.

- Q2 Total Class A VOCs as individual VOCs and Total Class B VOCs as Carbon report for 1st April 2018 to 30th June 2018.

We are pleased to report that all the results are within the permit limits.

Yours sincerely

- [1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum - maximum' measured values.
- [2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography.
- [3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.
- [4] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.
