### Part B

Any more accurate information on the matters for notification under Part A.	There was no issue identified with the lime system used for the Flue Gas Treatment (FGT) of SO <sub>2</sub> which would have required the event be recorded and notified as a period of abnormal operation. The root cause was therefore unidentified nonconforming waste that either introduced or allowed for production of atypically high concentrations of SO <sub>2</sub> . This also explains the very short lived, transient nature of the event.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	Waste ceased to be charged until the SO <sub>2</sub> had returned to typical levels and the abatement was confirmed as working correctly.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	No action applicable.
The dates of any unauthorised emissions from the Installation in the preceding 24 months.	10/4/2014, 30/6/2014, 23/8/2014, 12/11/2014, 8/3/2015, 13/3/2015, 2/4/2015, 8/4/2015, 9/4/2015, 2/6/2015, 17/8/2015, 18/9/2015, 22/9/2015, 22/1/2016
