

Schedule 6 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	BU7545IM
Name of operator	The Valspar (UK) Corporation Limited
Location of Installation	Parkway, Deeside industrial park
Time and date of the detection	17/01/2017 @ 12:45hrs

((a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident or fugitive emission which has caused, is causing or may cause pollution	
To be notified within 24 hours of detection	
Date and time of the event	17/01/2017 @ 12:45hrs
Reference or description of the location of the event	NR Wales officer detected odour in the area of Farrell's logistics
Description of where any release into the environment took place	Unclear where the release has emitted from on the Valspar site, as this is an ongoing investigation. Also the location reported was in the opposite direction as to where the wind was blowing, so this odour may not be related to the Valspar site.
Substances(s) potentially released	Unknown substances as the investigation is still ongoing to identify the source of the release, which once located, will determine what substances were involved
Best estimate of the quantity or rate of release of substances	The quantity and rates are unknown due to not knowing how long the issues was going on
Measures taken, or intended to be taken, to stop any emission	Ongoing investigation with actions to resolve the identified causes
Description of the failure or accident.	Not yet identified

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Emission point reference/ source	Not yet confirmed the exact location of the release point
Parameter(s)	Not yet known
Limit	Unknown
Measured value and uncertainty	Unknown
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	Full investigation continues to identify that the system is functioning correctly. More testing and mapping of emission points being reviewed

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	Odour was detected on the site boundary by Farrell's. The wind at the time was blowing in the wrong direction for it to be coming from the site, but the investigation is continuing to identify the cause.
Substances(s) detected	Unknown
Concentrations of substances detected	Unknown
Date of monitoring/sampling	

Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.
