

Operator: AB Connectors Ltd

Permit Reference Number: BV7443IP

Installation: Abercynon Inorganics

Reporting of Emissions to Air for the year 2021

Form Number: A1

| Emission Point | Substance or Parameter                   | Emission Limit Value  | Result <sup>1</sup> | Test Method <sup>2</sup> | Sample Date and Times <sup>3</sup> | Accreditation/Certification <sup>4</sup> | Uncertainty <sup>5</sup> |
|----------------|------------------------------------------|-----------------------|---------------------|--------------------------|------------------------------------|------------------------------------------|--------------------------|
| A1             | Particulate matter                       | 2 mg/m <sup>3</sup>   | 0.50                | EN13284-1                | 21.10.2021                         | MCEERTS                                  |                          |
| A2             | Particulate matter                       | 10 mg/m <sup>3</sup>  | 1.68                | EN13284-1                | 21.10.2021                         | MCEERTS                                  |                          |
| A3             | Particulate matter                       | 2 mg/m <sup>3</sup>   | 0.73                | EN13284-1                | 21.10.2021                         | MCEERTS                                  |                          |
| A4             | Scrubber liquor pH minimum               | 10.5                  | 11.52               |                          |                                    |                                          |                          |
| A4             | Oxides of nitrogen (as NO <sub>2</sub> ) | 1.5 mg/m <sup>3</sup> | 0.40                | EN14792                  | 21.10.2021                         | MCEERTS                                  |                          |
| A4             | Particulate matter                       | 2 mg/m <sup>3</sup>   | 1.62                | EN13284-1                | 21.10.2021                         | MCEERTS                                  |                          |
| Installation   | Solvent consumption                      | 3000 kg/year          | 0                   |                          |                                    |                                          |                          |

Operator's comments :

- <sup>1</sup> The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum - maximum' measured values.
- <sup>2</sup> Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography.
- <sup>3</sup> For non-continuous measurements the date and time of the sample that produced the result is given.
- <sup>4</sup> The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.
- <sup>5</sup> The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.
