Hi Steve/ Alan,

Thanks very much for this Part B. However, we would consider the 'Measures taken, or intended to be taken, to prevent a recurrence of the incident' insufficient. They would be deemed acceptable in that they are limiting, or putting an end to the pollution.

We would expect an investigation to look at the inspection and maintenance of the abatement equipment. Was it adequate and was it being adhered to?

If you have any queries or wish to discuss, please do not hesitate to contact me.

Regards Lara
