Name*	Stephen Blay
Post	SHEQ Officer
Signature	
Date	25 July 2014

• authorised to sign on behalf of SITA Healthcare Limited

Part B

Any more accurate information on the matters for notification under Part A.	As there was no issue identified with the efficacy of the treatment process and the breach was identified at a specific release point (A2), it is understood that there is a build-up of material in the abatement that consists of a condenser, scrubber and bio media filter. The condenser was inspected and found to be blocked with flock material.
Measures taken, or Intended to be taken, to prevent a recurrence of the incident	On the weekend 1 st to 2 nd August, the Filter Bio media will be replaced and the scrubber will be drained, cleaned out and replenished as recommended by the Consultant. Once this has been completed a re-test for Fungi will be organised.
