

ENVIRONMENTAL MANAGEMENT RECORDS

Subject: Schedule 1: Notification of abnormal emissions

Doc Id: WX-EMS-0023-EMR

Revision: 1

Date: March 2009

Part A:

Permit Number	BV 8016 ID
Name of Operator	Kellogg's Company of Great Britain Ltd
Location of Installation	Wrexham Breakfast Cereals
Location of Emission	Silo Yard
Time and date of Emission	17 th October 2014 16:50pm

Substance(s) emitted	Media	Best estimate of quantity or rate of emission	Time during the emission took place
Emissions Dust	Food Dust	Negligible (Localised area only)	Approx 5 mins

Measures taken or intended to be taken to stop the emission

On the 17th October 2014 at approximately 16:50pm we received a delivery of cracked wheat to the silos. During the discharge the raw material deliveries pipe became dislodged which resulted in flour dust being deposited for a short period of time across the silo yard. The emission was immediately stopped by immobilising the discharge to silos.

Part B:

Any more accurate information on the matters for notification under Part A

The raw material company have carried out a detailed investigation. The unicorn seal which fits inside the clamp had been renewed on the 1st October 2014. Despite the experience of the driver on this occasion he did not properly secure the clamp causing it to open during discharge which resulted in the dust emission. The emission was immediately stopped by immobilising the discharge to silos. The area was then cleaned.

Measures taken or intended to be taken to prevent a recurrence of the incident

The driver has been taken through a tool box talk and made aware how his failure to secure clamp has caused this incident and the implications.

Measures taken or intended to be taken to rectify, limit or prevent any pollution of the Environment or harm which has been or may be caused by the emission

The raw material company have taken this incident seriously and have communicated the implications to all relevant personnel on ensuring that the correct procedure is followed.

The dates of any authorised emissions from the installation in the proceeding 24 months
