REF: Request to extend Waste Trial Operation under P004 for 6 months, until 14/07/2015, following the guidelines for T25 exemption

Dear Matthew,

As we have previously discussed, we would like to extend the trial waste operation plant on the poultry processing site at Sandycroft for a period of 6 months such that we are able to complete our analyses of the blood treatment. The details of the site are as follow:

Two Sisters Poultry Ltd
Glendale Avenue
Sandycroft
Deeside
Flintshire
CH52QP

The Ordnance Survey Grid reference is: SJ 33082 67314

The company registration number is: SC440782

The contact details for the site are:

Steven van der Klieft - QHSE Manager
Steven.VanDerKeift@2SFG.com
Tel: 01244 535155
Fax: 01244 531390

The purpose of this extension is to optimise the multi-stage Anaerobic Digestion (AD) process on the site such that the enzymes and the pasteurisation process is ensured and can be scaled up to a unit that would be able to process all the waste blood on the site. I have attached a document showing the detail that we have been able to achieve on our pilot plant processing "potato based ready meals" such that you can evaluate the information retrieved and the impact that this had on the design.

From previous applications to operate this trial plant, the following conditions continue to be met: we will be treating waste under the Waste Code 202020; that there will be a maximum of 350kg entered into the system daily; that the system has a capacity of 28 days (7 tanks at 1500litre capacity each). We may reduce the amount of blood going into the system if there is a need for dilution although we do not believe this to be the case, based on the laboratory trials.

Registered Office: 2 Sisters Poultry Limited, George Street, Coupar Angus, Blairgowrie, Perthshire, Scotland PH139LU. Company Number SC440782 VAT GB 168743330
