

Doc B2.7 Environmental risk assessments

Environmental risk assessments have been completed for relevant emissions from an installation using the Environmental Risk Assessments (EPR-H1) methodology. The assessments are included in the following documents:

- Doc B2.7.1 Annex (a) Amenity and accident risks from installations and waste operations
- Doc B2.7.2 Annex (d) Surface water (basic)
- Doc B2.7.3 Annex (f) Air emissions
- Doc B2.7.4 Annex (g) Disposal or recovery of waste produced on site
- Doc B2.7.5 Annex (h) Global warming potential

There will be no emissions into ground water under normal circumstances and risk assessment for ground water was not considered necessary.
