Measures taken, or intended to be taken, to stop the emission	See below.			

### Part B

Any more accurate information on the matters for notification under Part A.	<p>The levels in LC1 have fluctuated between 11.93m and 4.85m during June. However, on the 26<sup>th</sup> June the well was recorded as dry at a depth of 18m and the transducer reading was also showing a compliant reading of 1.25m.</p> <p>The levels in LC2 have fluctuated between 2.65m and being dry, which again shows a significant improvement within Cell 2.</p> <p>LC3 has been consistently below compliant levels throughout this reporting period.</p> <p>During June 1399 m3 of leachate was removed from site for treatment. This reduction in volume of leachate collected from the site also demonstrates that the site is drying up generally.</p>
Measures taken, or intended to be taken, to prevent a recurrence of the incident	See above.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	None – no pollution or harm has occurred.
The dates of any unauthorised emissions from the installation in the preceding 24 months.
