

# Schedule 6 - Notification

RECEIVED  
09 MAY 2013

**Part A**

Permit Number	BS8621
Name of Operator	Cory Environmental (Central) Limited
Location of Installation	Bangor Road Johnstown Wrexham LL14 6ET
Time and date of the detection	Date entered onto Cory database

**b) Notification requirements for breach of a limit**

To be notified within 24 hours of detection unless otherwise specified

Emission point reference/source Parameter(s)	Date	Sample Point	NH4-N (mg/l)	Limit (mg/l)
Limit	05/02/2013	HAF SW 1A	5.2	1.6
Measured value and uncertainty	05/03/2013		1.1	
Date and time of monitoring	16/04/2013		2	

Light yellow shows past breaches.

Measures taken, or intended to be taken, to stop the emission

**Part B**

Any more accurate information on the matters for notification under Part A.	The North West surface water lagoon has a low level of water at the time of sampling. Return of Canada Geese in the lagoons could be adding to the nutrient content of the water which in turn could be affecting the water chemistry. During April we had record numbers of Great Crested Newts identified in the North West Lagoons which provides a good indicator of general water quality within the ponds.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	We will continue to monitor surface water quality, to assess if this minor breach in limits may be caused by increased wildfowl numbers on the ponds.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	N/a
The dates of any unauthorised emissions from the installation in the preceding 24 months.	See previous Schedule 6 reports.
