**Part B**

Any more accurate information on the matters for notification under Part A.	<p>The levels in LC1 have increased during the first two weeks in February, but this is thought to be due to perched leachate and more latterly an issue with the electric pump. A new pump was installed on the 4<sup>th</sup> February 2014, and since the 11<sup>th</sup> February leachate heads have been reduced. The transducer readings have not been possible due to an electrical issue.</p> <p>LC2 and LC3 have been consistently below compliance levels throughout this reporting period.</p> <p>During February 2819 m3 of leachate was removed from site for treatment. This was again a very large amount and reflects the extremely high rainfall experienced during the month.</p>
Measures taken, or intended to be taken, to prevent a recurrence of the incident	See above.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	None – no pollution or harm has occurred.
The dates of any unauthorised emissions from the installation in the preceding 24 months.
