Part B

Any more accurate information on the matters for notification under Part A.	<p>The levels in LC1 have fluctuated between 15.99m and 18.06m during September, but these are not thought to be a true reflection of levels in the Cell. The transducer readings have been compliant throughout, but only at the depth the pump can be lowered to.</p> <p>Following the camera survey on the 27th August, it was found that the two monitoring chambers LC1 and LC2 have damaged pipework which restricts the opening and is preventing the pumps going down to the base of the chamber. Method Statements have been sent to NRW detailing the redrilling of two new monitoring points. This work is expected to begin week commencing 4th November 2013.</p> <p>LC2 and LC3 have been consistently below compliance levels throughout this reporting period.</p> <p>During September 1140 m3 of leachate was removed from site for treatment.</p>
Measures taken, or intended to be taken, to prevent a recurrence of the incident	See above.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	None – no pollution or harm has occurred.
The dates of any unauthorised emissions from the installation in the preceding 24 months.
